STANLEY**COMPLETE GUIDE TO THE UNIVERSAL FIT**

POWER TOOL ACCESSORIES RANGE.

Welcome to the launch of STANLEY universal fit power tool accessories range. Designed to be the ultimate accessory solution for all leading powertool brands, whilst meeting the demanding needs of professional tradesman and serious DIY'ers alike.

The range comprises over 1000 products to cover every type of application, some available in two quality levels STANLEY, for good quality general use and STANLEY FatMax, engineered for the trade, and the most demanding and specialist jobs.

Whether you are a professional tradesman or DIY'er, STANLEY helps you work better, smarter and faster.

Quality

STANLEY is committed to quality manufacturing. Through its extensive technological expertise, STANLEY maintains its manufacturing quality to the highest possible level.

Manufactured in Europe

High performance masonry drill bits are manufactured in Germany at the STANLEY ISO 9001 certified production plant. 133 staff work side by side to ensure the quality of every drill bit produced.

Discovery team

STANLEY has its own Research & Development facilities looking after not only the factory organisation and tools, but more specifically responsible for the design of new patented products. Its expert use of the latest available technologies allows STANLEY to develop innovative products that meet the expectations of the market in terms of quality, safety and swift installation.

EASY SELECTION

Instore point of sale designed to guide you directly to the correct product. With quality levels clearly defined along with the features and benefits of the STANLEY FATMAX range

Packaging is designed to make selection quick and simple, with easy to read graphics, for product applications, tool fitment and material usage.

CONTENTS

Metal Drill Bits	6-11	Sanding Sheets	64-75
Masonry Drill Bits	12-13	Holesaws	76-79
Concrete Drill Bits	14-15	Reciprocating Blades	80
Tile/Multi Material	16	Scorpion Blades	81
SDS-Plus Connection Drill Bits	17	Diamond Blades	82
SDS-Plus Drill Bits	18	Sanding and Fibre Discs	83
Chisels	19	Bonded Abrasive Discs	84-85
Wood Drill Bits	20-23	Pads and Polishing Bonnets	86-87
Quick Change	24-25	Wire Cup and Wheel Brushes	88-89
Drilling Mixed Sets	26	Flap Wheels	90
Drill Bit Sets	27	Mounted Stones	91
Screw Lock	28-31	Router Bits	92-93
Screwdriver Bits	32-37	Rasps and Cutters	94-95
Gift Sets	38-39	Chucks and Keys	96
Jigsaw Blades	40-51	Doweling, Plugs and Accessories	97-98
Circular Saw Blades	52-56	Paint Mixers	99
Oscillating Tools	57-59	Other Tool Related Accessories	100
Mesh Sanding Sheets	60-63		

UNIVERSAL FIT

DRILL BITS

Constant innovation, in depth reseach, and years of European manufacturing expertise, have resulted in a comprehensive range of high quality drill bits. Suitable for every type of material from concrete, masonry, brick, natural stone and tile, all types of thick and thin metals including pipes and every type of natural or man made wood as well as plastics.

STANLEY VS FATMAX – THE DIFFERENCE

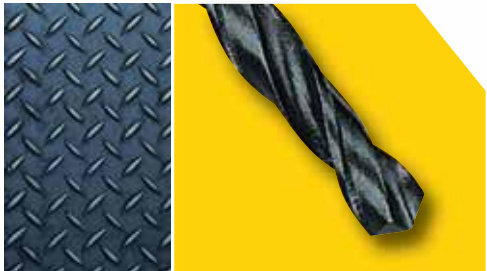

STANLEY

Excellent quality general purpose drill bits, suitable for normal use.

STANLEY
FATMAX

Top of the range drill bits, designed for the professional tradesman, with innovative features for very demanding or specialist tasks. Manufactured to last up to three times longer than general purpose bits and renowned for their strength and reliability.

DRILLING: METAL DRILL BITS

STANLEY HSS-R GENERAL PURPOSE

Use for drilling into soft steel and non ferrous metals. Made from High Speed Steel (HSS). Suitable for normal use. Available in sizes 1 - 16mm diameter, as well as mixed size sets

HSS-R – FOR MOST METALS

DRILLING: METAL DRILL BITS

PRECISION METAL DRILLING

Innovative tip design gives accurate drilling on contact with the metal, no slipping, or 'walking'. Ideal for metal pipes and curved surfaces. Use for sheet steel, soft steel and non ferrous metals.

Available in sizes 1 - 13mm

Super sharp cutting edges for faster drilling

Special tip for clean precise drilling and burr free holes

Special CNC manufacturing process for longer life

SUITABLE FOR:

METAL

WOOD

PLASTIC

PLASTERBOARD

ALSO AVAILABLE IN SETS

DRILLING: PRECISION METAL

DRILLING: CONCRETE DRILL BITS

STANLEY
FATMAX

PRECISION CONCRETE DRILLING

The strongest most precise drill bit for fast drilling in Concrete, Natural Stone and Masonry. Gives excellent performance in Cordless drills.

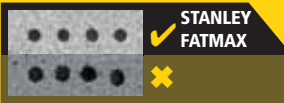

Available in sizes 3 – 16mm diameter and mixed size sets.

4 flute design drills much quicker

Stronger metal for longer life

Special flat tip for less breakage and clean accurate holes

No spin shank grips tighten in the chuck

SUITABLE FOR:

CONCRETE

MASONRY

STONE

ALSO AVAILABLE IN SETS

DRILLING: CONCRETE DRILL BITS

DRILLING: WOOD DRILL BITS

STANLEY[®] SPECIALIST WOOD BITS

AUGER BITS

Fast rough drilling in beams and softwood

FORSTNER BITS

Accurate, clean, flat bottomed holes in hardwood, softwood and laminates

HINGE HOLE CUTTER

Easy, precise recess holes for hinge placement, in wood laminates and chipboard.

AUGER BITS - FOR FAST ROUGH DRILLING OF DEEP HOLES IN WOOD, BEAMS, ETC.

NEW
SCREWLOCK
SYSTEM

INTRODUCING THE NEW
STANLEY SCREWLOCK
FULL FIT HEAD SOLUTION

**BADLY FITTING
SCREWDRIVER BITS**
CAUSES BURRING,
STRIPPING AND SLIPPING

**SCREWLOCK
FULL FIT HEAD**
LOCKS IN TIGHT TO THE
SCREWHEAD, AND REDUCES
BURRING, SLIPPING
AND STRIPPING

**PROBLEM SCREWDRIVING IN HARD
TO ACCESS AREAS AND OVERHEAD TASKS?**

**SCREWLOCK 10 X MAGNETIC
FORCE BIT HOLDER**
HOLDS THE SCREW TIGHTLY IN
PLACE, SO YOU DON'T HAVE TO,
NO MORE DROPPED SCREWS!

EASY ONE HANDED USE
ALLOWS YOU TO HOLD THE
OBJECT IN POSITION WITH
ONE HAND, AND SCREWDRIVE
WITH THE OTHER.

**EASY ACCESS TO TIGHT
AND AWKWARD AREAS**
ALLOWS ONE HANDED USE
WHERE SPACE IS TOO
TIGHT FOR TWO

**THE COMPLETE
SOLUTION FOR EASY
SCREWDRIVING.
AVAILABLE NOW!**

SCREWDRIVER BITS

Forged and ground for long life and durability, precision machined for perfect fit in all types of screwheads. Available for general purpose use, as well as heavy duty professional use.

The range comprises

	25mm bits
	25mm bits
	50mm bits
	50mm bits
	Double ended bits
	Extra long double ended bits
	Bit holders and adaptors
	Countersink bits

STANLEY VS FATMAX – THE DIFFERENCE

STANLEY

Excellent quality general purpose.

**STANLEY
FATMAX**

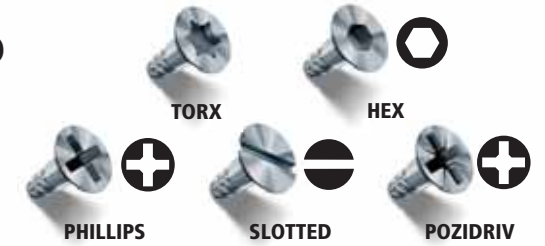

Professional quality Torsion bit absorbs high levels of impact, minimises damage to screwheads, reduces slipping and lasts much longer.

DRIVING: SCREWDRIVER BITS

STANLEY TORX SCREWDRIVER BITS AND MIXED SCREWDRIVING SETS

Ideal for all DIY jobs around the house

JIGSAW BLADES

STANLEY Jigsaw Blades are manufactured to the highest standard using superior quality materials.

The range comprises blades for different materials and specialist applications, available in two quality levels, in both U shank and T shank fitment. The fitment icon is clearly marked on the packaging along with individual powertool brand names.

STANLEY VS FATMAX – THE DIFFERENCE

Good quality blades for general purpose cutting in wood, metal and other materials

Stronger, less breakage and longer life compared to general purpose blades.

CHOOSING THE RIGHT SHANK

**U SHANK**
Fits: Black+Decker (old), Powerbase, Skil, Kress (old)

**T SHANK**
Fits: Bosch, AEG, Makita, Hitachi, Metabo, Ryobi, Mac Allister, DEWALT, Powerbase, McKeller, Stanley FatMax, Black+Decker (new)

TYPE OF CUT

As a quick visual guide - the more teeth per cm on the blade, the smoother, cleaner and more accurate the cut. Fast rough cutting blades will have less teeth.

BLADE MATERIALS

TCT/HM
Tungsten carbon coated blades for ceramics, fibreglass, chipboard and tough materials. Manufactured from extra hard metal for longer life.

HCS
High carbon steel , designed for cutting softer materials, softwood, fibreboards and soft plastics.

HSS
Hardened high grade, high speed steel, perfect for cutting metal, aluminium and non-ferrous metals

BIM
Bi-Metal bond of HCS and HSS for repeated cutting in hardwood, hard plastics, non-ferrous and ferrous metals. The blades last much longer than HCS and there is less risk of shank breakage.

CUTTING: JIGSAW BLADES

STANLEY JIGSAW BLADES FOR WOOD

Blades available for different types of cut in a variety of woods and other materials.

WOOD AND OTHER MATERIALS - 'U' SHANK - FITS BLACK+DECKER (OLD), POWERBASE, SKIL, KRESS, (OLD)

CIRCULAR SAW BLADES

A comprehensive range of quality blades for different types of wood and cut. It is important to use the correct blade for the material you are cutting, and the type of cut you want to achieve.

STANLEY VS FATMAX – THE DIFFERENCE

STANLEY

STANLEY FATMAX

Good quality blades for general use

Top of the range blades designed for professional use. Regrindable.

CUTTING: CIRCULAR SAW BLADES

STANLEY CIRCULAR SAW BLADES

STEEL SMALL TEETH. Fine cross cutting in softwood and plywood. Not suitable for hardwoods	TCT/HM MEDIUM TEETH. Tungsten Carbide Tipped. Fine cross cutting hardwood, softwood and man made boards	TCT/HM LARGE TEETH. Tungsten Carbide Tipped. Fast rip cutting in hardwood, softwood and man boards

STANLEY FATMAX

CIRCULAR SAW BLADES

A comprehensive range of high quality blades for fast RIP cutting and fine cross cutting.

TCT/HM PRECISION CUT/ LAMINATE

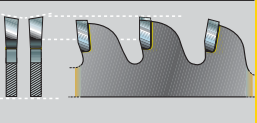

Fine teeth, Tungsten Carbide Tipped. Regrindable
Fine cross cutting in laminated chipboard hardwood, softwood, man made boards and plywood.

TCG Triple Chip Grind
Bevel alternates from left to right on subsequent teeth.

TCT/HM PRECISION

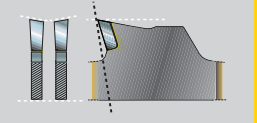

Medium teeth, Tungsten Carbide Tipped. Regrindable
Fine cross cutting in hardwood, softwood and man made boards.

ATB Alternate Top Bevel
Bevel alternates from left to right on subsequent teeth

TCT/HM TOUGH CUTTING

Large teeth, Tungsten Carbide tipped. Regrindable
Fast rip cutting in recycled timber with hidden nails and mortar (remove visible nails prior to cutting) hardwood and softwood.

Wedge Shoulder
Absorbs the impact on teeth should the blade hit a concealed nail or other foreign object.

SUITABLE FOR:

WOOD

LAMINATE

PLYWOOD

CHIP BOARD

Tungsten carbide tipped teeth for improved accuracy and better finish, stays sharper much longer

Regrindable teeth for longer working life

Expansion slot to disperse heat, reduce vibration and prevent blade deformation

Available in sizes ø130 - ø250mm

NEW

MESH SANDING

QUICKER, CLEANER, EASIER.

A revolution in sanding. Tough, anti-clogging, and re-useable, the continuous mesh surface gives increased dust collection, and will always fit the dust extraction hole configuration on your sander which ever you are using.

Tough Anti-Clogging sanding mesh, lasts up to 4x longer than traditional sandpaper.

Anti-Clogging mesh surface, means longer time sanding less time changing sanding sheets.

Mesh can be easily cleaned. Just tap out the dust or rinse, dry and re-use.

THE GRIT EXPLAINED

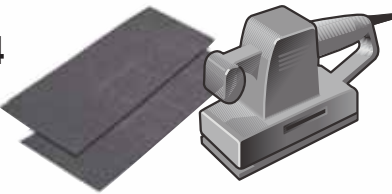

MESH SANDING: ORBITAL

STANLEY[®] FATMAX[®] MESH ORBITAL SANDING - 1/2 1/3 1/4

Ideal for flat sanding jobs such as doors, and for fine finishing between coats of paint. Tough, anti clogging sanding mesh, last up to 4 times longer than traditional sheets.

SANDING SHEETS

FOR EVERY APPLICATION

Available to fit all major brands of power sanders as well as angle grinders and drills. Unpunched bulk rolls are a good, cost effective solution for larger jobs. Check the fitment information on the front of the packaging for the correct sheet to fit your sander.

THE GRIT EXPLAINED

COARSE

24 - 100

PREPARE:
For fast removal of most materials. Ideal for paint and varnish.

MEDIUM

120 - 150

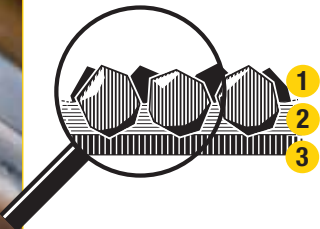

SMOOTH:
Removes and smoothes for a basic finish.

FINE

180 - 240

FINISH:
Ideal between coats of paint and Varnish. For the perfect finish.

RESEARCH AND TESTED

- 1

GRIT/ABRASIVE
Higher the grit number, the finer the grit quality.
- 2

BINDER
Grit coated with natural glue and synthetic resin for flexibility and durability.
- 3

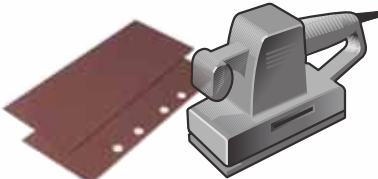

BACKING
Paper - for flexibility and basic sanding.
Fibre - for high speed sanding with angle grinders. Heavy Duty.

SANDING SHEETS: ORBITAL

STANLEY[®] ORBITAL SANDING – 1/2 1/3 SHEET

Ideal for flat sanding jobs such as doors, and for fine finishing between coats of paint.

Orbital Sander

HALF SHEET - 115 x 280mm

HOLESAWS

A STANLEY holesaw fitted in a drill is the most efficient way of making a perfectly round large diameter hole in a range of materials. The holesaw neatly cuts the perimeter of the hole, removing a cylindrical plug of material, as opposed to removing all the material as it drills.

STANLEY VS FATMAX – THE DIFFERENCE

STANLEY

Good quality holesaw for most woodworking uses.

**STANLEY
FATMAX**

A precision made Bi-Metal holesaw that cuts metal and wood. Gives constantly better results and stays sharper for longer.

CUTTING: HOLESAWS

STANLEY HOLESAWS

HCS - Manufactured from high carbon steel, a good quality holesaw, suitable for most woodworking jobs

TCT - A special Tungsten Carbide coated range for use in masonry, brick, plasterboard and Thermalite

HCS HOLESAWS - FOR WOOD

CUTTING: SCORPION BLADES

STANLEY FATMAX SCORPION BLADES

Break resistant and flexible Bosch multi saw blade for cutting metal. STANLEY Blades for cutting wood metal and plastic, with a dedicated Scorpion fitting.

Large Scorpion – blade

For straight and rip cutting in wood, chipboard and plastic

Metal

For cutting sheet metal, aluminium, copper pipes and other non-ferrous metals

Wood/plywood – curved cut

For cutting curves in hardwood, softwood, plywood, chipboard and laminates

Planer blades available in STANLEY and FatMax quality

POWER TOOL ACCESSORIES: PADS AND POLISHING BONNETS

STANLEY PADS BONNETS AND ACCESSORIES

Backing pads for angle grinders, sanders and drills.
Use firmer pads for heavy duty applications, softer pads for flexibility and finer finish.
Polishing bonnets convert your angle grinder or drill, into a high speed polisher for a smooth glossy finish.
